

CHAMBERLAIN®

ACCESSMASTER®

M385

1/2 HP Garage
Door Opener

Providing access with convenience, safety and value.

AccessMaster® garage door openers offer the added assurance of Security+® technology. Plus, each system includes several patented features designed to provide safety, security and reliability.

4-Year Motor Warranty

At Chamberlain, safety is a major part of our mission. It's our commitment to you and, quite simply, the way we produce products every day. Our LiftMaster® products are designed to move the largest door in your home, safely, securely and by always putting safety first.

M385 Garage Door Opener System includes:

Dependable 1/2 HP motor chain drive provides heavy lifting power.

Multi-function control panel

One-button
Security+® remote

M385 System Features

The Protector System®

Projects an invisible light beam across the inside of the garage door opening. If anything interrupts this beam while the door is closing, The Protector System® automatically reverses the door before making contact. If this beam is obstructed, the door will not close.

8-remote capability Ideal for families with multiple drivers, the system can accommodate up to 8 Security+® Remote Controls and 1 Security+® Keyless Entry.

Security light Turns the garage door opener light on automatically when The Protector System® beam is broken.

Equipped with PosiLock®

When the garage door is down, it stays down and securely locked.

The in-vehicle wireless control system See your automobile dealer for availability.

Chain drive with solid-steel T-rail Provides extra strength and dependability.

Automatic light delay As the garage door opens and closes, the light goes on and then turns off 4-1/2 minutes later.

Manual release handle

In case of power failure, door can be operated manually. When power is restored, a push of the button reconnects the door and garage door opener.

Optional Accessories

3-button remote control with Security+® Model 373AC

3 buttons to operate up to 3 garage doors. You can turn garage door opener lights on and off, too.

Wireless keyless entry with Security+® Model 377LG

Open your garage door without using a remote control and close with just the push of a button. Also can be programmed with a temporary entry code for friends and service people.
